

# The Family Place

**Families in Transition  
offers more than just a shelter.**

.....  
The Family Place provides comprehensive services designed specifically for families & children under one roof.

Collectively known as the **Family Place Resource Center and Shelter** at 177 Lake Avenue, Manchester, NH, this facility will house a new and expanded family shelter, as well as a comprehensive resource center specifically designed to meet the needs of homeless families and children in Manchester. The dual purpose nature of the program will ensure that families with complex and varied needs are able to quickly and easily access the services that they need to regain housing stability and long-term wellness.

In addition to providing emergency shelter, this project will create a comprehensive resource center which will provide families who are homeless or at risk of becoming homeless with a number of essential services.

## Partnering with other nonprofits our facility will provide:

- 1 A home for 80 parents with 120 children per year.
- 2 Domestic violence education.
- 3 Services to assist continuity in education for homeless children.
- 4 Access to employment assistance and pre-employment skill building.
- 5 Specialized therapeutic preschool for homeless children.
- 6 Assessments and therapeutic supports for parenting, mental health and substance use.
- 7 Critical healthcare for children and families.
- 8 Guaranteed nutritious meals for shelter residents.
- 9 A warm place for homeless families with their children to wait when they have no place to go. No more waiting in the police station waiting room or living in their car.
